This post will come in handy not only for photographers looking for inspiration, but also all the ladies out there who want to look great in every shot. Here are some of the best poses which highlight your best features and hide even the most obvious imperfections. You'll be a supermodel in no time.

1. **This is simply a great angle** which always make you look slimmer. The model faces the camera side-on, with her chin pushed down and her shoulders slightly raised.

2. **Often, the most straightforward poses turn out to be the best ones.** Here, the model should put her body weight all on one leg, bending her overall stance slightly so that her silhouette is 's-shaped'.

3. Here the model lightly touches a vertical surface, such as a wall or a tree, with both hands. **This is a great pose for taking a portrait shot.**

4. **If the model has long hair, definitely try to take an 'action shot' of her while she is moving.** A good way to do this is to have her turn her head sharply.

5. **This is a great, comfortable pose** which can be used when taking photos at home, in a studio, and in many other locations.

8. **This pose is ideal for an artistic shot.** There are a huge number of positions for the head, arms and legs

which can be adopted.

10. However, you don't always have to worry too much about where to put the arms. **It's perfectly OK to leave them in a relaxed position at one's sides.** The same goes for the legs, although remember that body weight should always be on one foot only.
