

# **7 Fantastic Pieces Of Advice For Taking Photos On The Beach**

1.  
Raise your chin,  
straighten your shoulders – and smile!

2.  
Put your legs together  
and raise yourself up on your tiptoes.  
This strikes a more impressive pose  
and makes your legs look longer.

3.  
Cross your legs, hold in your stomach,  
straighten your back and place your hands  
on your waist for a very flattering shot.

4.  
When lying on a deck chair,  
try to simply rest on your elbow rather  
than spread all of your body weight on it.  
Also, keep your knees together.

5.  
If you're taking a photograph in profile,  
be careful not to stoop.

6.  
Do not stoop when you're taking a shot  
sitting down either. In fact, avoid stooping  
even when you're not taking a photograph!

7.  
If you're taking a shot close up,  
it's better to take it with your face and  
body slightly turned away from the camera,  
and with your chin somewhat raised.
