15 Exercises Every Woman Should Do to Improve Her Sex Life

Overview

You’re only one workout away from a better sex life! Not only can you lose weight, sculpt a strong, lean body and cause your endorphins to soar, but you can also count on exercise to make your time in the sack more enjoyable. Recent research indicates that improved body image as well as doing as little as 20 minutes of exercise a day enables you to enjoy sex more and become more sexually aroused. In addition to cardio and strength training, flexibility is crucial for better sex. It helps alleviate aches and pains and allows you and your partner to experiment with positions that otherwise may be difficult. The following slides provide a series of 15 exercises and stretches you can do to enhance your time under the covers.

1. Squats

Squats are great for toning and shaping the legs and booty. But all that blood pumping below the waist can also improve your ability to become aroused during sex. Plus, squats strengthen and prepare you for those times you'd like to be the one on top. HOW TO DO THEM: Stand upright with your feet shoulder-width apart. Keeping the heels glued to the floor and most of your weight in your heels, initiate a bend at the waist first, then bend the knees, as if sitting into a chair. Be sure to keep the knees from passing in front of your toes to protect your knees and leg muscles from injury. Your shins should remain as vertical as possible throughout the exercise. You can also incorporate three- to five-pound weights and raise your arms to shoulder height as you squat down. Move up and down very slowly and do between 10 and 30 reps.

12 Essential Squat Variations to Try

2. Bridge Pose

Bridge pose is the precursor to pelvic tilts and Kegels (read on for more on both exercises). It strengthens the glutes,

inner thighs and hamstrings and stretches the hip flexor. Because the pelvis is inverted, bridge pose awakens the pelvic-floor muscles and can reinforce the female sex organs. This can lead to stronger, more controlled orgasms. HOW TO DO IT: Begin on the floor on your back. Lengthen through your fingertips with your arms on the floor by your sides. With your feet hip-distance apart, bend your knees then slowly lift your buttocks off the floor. As you hold the posture, keep your knees from splaying out and press through your feet, your weight evenly distributed between your feet. Do not allow your feet to roll outward. Hold the pose for 30 to 60 seconds. Lower your spine one vertebra at a time, all the way down to the tailbone.

10 Yoga Moves to Remove Stress and Relax You at Bedtime

3. Pelvic Tilt Pulses

This exercise strengthens your core and lower back, which are used often during sex. Pelvic tilt pulses will also awaken the lower abdominal region and prepare your body for Kegels (another great exercise to enhance your sex life) and prepare your body for inverted positions. HOW TO DO THEM: Lie on the

floor with your knees bent, feet hip-distance apart and arms, hands and fingertips flat on the floor. Pressing through your heels, lift your pelvis and glutes to bring your torso into a straight line (as in bridge pose). Hold your abs tight as you continue to press through the heels, squeeze the glutes and inner thighs and slightly pulse the pelvis up and down (just a couple of inches, not the full range of motion). Do 20 to 25 pulses, then slowly lower the spine, vertebra by vertebra, until you feel your tailbone touch the floor. Repeat, working up to three to five sets.

17 Exercises to Shape and Tone Your Booty

4. Kegels

The pelvic floor muscles play an integral part in orgasm, and Kegels are an easy way to improve the strength of those muscles. Additionally, they provide great sexual satisfaction and stronger orgasms (especially when Kegels are done during sex) by targeting the muscles that tighten and release during sex, making the entire experience more pleasurable for both you and your partner. HOW TO DO THEM: You can do Kegels anywhere – sitting, standing or lying down. Focus on

tightening those pelvic floor muscles (as though you're attempting to stop the flow of urine). Hold for three to five seconds and repeat. Do that for five minutes a day or throughout the day.

5. Stability-Ball Pull-Ins

A strong core is essential in preventing injuries to your back when having sex. One of the best exercises to strengthen your abdominal muscles and protect your back is the stability-ball pull-in. This exercise works your core (which provides a support system for your back) as well as your upper body, boosting your endurance for on-top positions. HOW TO DO THEM: Start in a plank position with your shins supported on a stability ball. Keep your arms straight and strong. Slowly roll the ball in, using your abs to bend your knees toward the floor as you drag the ball toward your chest. Slowly roll the ball back out as you straighten your legs. Keep your upper body and hips strong throughout the range of motion to prevent injuring your lower back. Don't hunch your shoulders and lengthen through the crown of the head to be sure there is

space between your head and shoulders. For an added challenge, lift one leg off the ball as you roll the ball forward with the other leg. Then switch legs. Do two to three sets of 10 reps.

The 15 Toughest Do-Anywhere Workout Moves

6. Plank Pose

Plank pose is one of the most effective ways to strengthen your entire body while focusing on your core. It not only increases your endurance and stamina at the gym but in the bedroom, too. HOW TO DO IT: Press your body straight, extending your legs back and keeping your arms strong. Think of keeping your body in a straight line from your feet to your head. Your pelvis is neither sagging too low nor elevated too high. Engage the abs, squeeze your inner thighs and butt cheeks together, tighten your quads and press your heels back so your feet are flexed. If you need to modify the pose, do your plank on your knees. Be sure your forearms are on the floor and your elbows are directly under your shoulders throughout the hold. For a more advanced version, raise one foot a few inches off the ground and hold for 10 seconds, then

switch legs without compromising your form. Hold for at least 20 seconds and work up to two minutes at a time. Do one to 10 reps a day, depending on the length of your plank holds.

30-Day Ab Challenge

7. Open-Leg Rocker

“Open-leg rocker is essential for improving balance through core control and strength,” says Risa Sheppard, master Pilates certification trainer and founder of The Sheppard Method in Los Angeles. „As we strengthen our core, which includes the pelvic girdle, lower back and abdominals, it awakens not only the muscles, but all the pathways that help to enhance our sexual pleasure… [And] the open-leg portion of the exercise creates flexibility in the inner thighs, making various positions more accessible.” HOW TO DO IT: Sit upright with your knees bent into your chest, legs about shoulder-width apart. Lengthen through the crown of your head, roll your shoulders back and down and lift your chest so your back is strong. Grasp your ankles on the outside of the legs. Pull your naval deep into your spine and lean back until you are balanced on your tailbone with your feet off the floor.

Straighten both legs toward the ceiling in an open V position and balance. To initiate the rocking, inhale, draw your naval to the spine and bring your chin to your chest. Keeping your head tucked, roll backward, stopping the action and reversing it before you get to your neck. Upon return, stop and balance on the tailbone, legs open and up toward the ceiling. If you need to modify the exercise, keep your legs bent.

Top 10 Pilates Exercises

8. Seated Leg Extensions

For many women, when the legs are fatigued during a workout, they may shake or quiver. This is a good thing while working out, but in the bedroom, not so much. You want to know you can count on your legs to go the distance. And seated leg extensions are a simple way to strengthen your legs and increase stamina. HOW TO DO THEM: Sit in a chair, roll your shoulders back and down and lift your chest. Bend your knees at a 90-degree angle with your feet flat on the ground. Make sure your ankles are directly under your knees. Grip the sides of the chair without hunching your shoulders or tightening your neck, upper back or shoulders. Keep the hips firmly

planted on the chair as you lift and unbend one leg and lift the leg straight up slowly, until it reaches hip height. Slowly bring the foot back down. To modify the exercise, shorten your range of motion in the leg you are lifting, taking the leg half the distance. For an added challenge, lift both legs at once. Do at least two to three sets of 10 reps on each leg.

10 Machine-to-Free-Weight Swaps

9. Triceps Dips

Solid arm strength is crucial for many everyday tasks, but especially during sex. Working the triceps will strengthen and enable you to prop yourself up without tiring in underneath positions. HOW TO DO THEM: Sit with the heels of your hands on the edge of a sturdy chair, knuckles rolled down toward the ground to alleviate wrist strain. Place your feet hip-width apart and bend your legs at a 90-degree angle, making sure your ankles are directly below the knees (they can also be further out in front of the knees or completely straightened, if you'd like a challenge). Slowly slide your butt off the seat, supporting your weight with your hands and arms. Keeping

the elbows facing directly behind you, bend the elbows and slowly lower your butt toward the floor. Keep the elbows pointing straight back behind you, and bend them to about a 90-degree angle (don’t overstretch the front of your shoulders by going too low to begin with). Slowly push back up until your arms are straight. Need more of a challenge? Hold your feet and legs in a figure-four position (one ankle sits on the other leg’s thigh, with the top foot flexed). Do five to 10 of these before switching legs.

Upper Body Workout Routines for the Gym

10. Push-Ups

Just like planks, push-ups strengthen your core, shoulders, glutes and legs with the added bonus of improved strength in your arms and chest. Also, the intensity that comes from doing push-ups will increase your stamina and endurance. HOW TO DO THEM: Start a plank position. Be sure your pelvis does not sag too low or lift too high (think about keeping your body as straight as a board). Inhale as you lower your chest until it almost touches the floor. Exhale as you press back up to the starting position. Avoid hunching your shoulders into your

neck by lengthening out of the crown of the head to create space between you head and shoulders. To make push-ups easier, separate your feet to hip-distance apart or do push-ups on your knees. Or if you want to make them harder, place your feet on a step or bench.

30-Day Abs Challenge

11. Bridge Bench Press

Women who shy away from on-top positions during sex often do so because of the exertion involved. The bench press will definitely increase your arm and chest strength, but this variation takes it a step further by doing it while in bridge pose. Bridge wakes up those pelvic floor muscles (the ones that help control your orgasms), improving blood flow to the entire area and waking up the receptors that allow for more pleasure during sex. HOW TO DO IT: Lie on your back with three- to five-pound dumbbells easily accessible. Bend your knees and keep your feet about hip-distance apart. Slowly lift your glutes up into bridge pose. Holding the dumbbells, bring your elbows out to the sides of your shoulders with your dumbbells up toward the ceiling, making a goal-post shape with

your arms. Slowly press the dumbbells straight toward the ceiling, then slowly return back to the goal-post position. As a modification, try this on an incline bench and start with lower weights. Or for an added challenge, cross one leg over the other, ankle placed on the grounded leg’s thigh. Do half of your reps and carefully switch legs. Do 10 to 20 reps and release your bridge in between sets. When you are finished, lower one vertebra at a time, all the way down to the tailbone. Do three to five sets.

12. Upward-Facing Dog

Upward dog strengthens many of the muscle groups required by a wide variety of sex positions – the lower back, the glutes and the arms – while stretching the core, psoas and hip flexors. And yogis have long believed it to increase energy and blood flow to the pelvic region. HOW TO DO IT: Lie on your belly with your legs hip-distance apart and the tops of your feet on the floor. Bring your hands to the sides of your chest and raise your torso by pressing through the hands. Lifting all the way up, roll your shoulders back and down, lengthening through the crown of the head so you don’t hunch your shoulders into your neck. Breathe regularly for about 15 to 30

seconds. If you’re advanced, your thighs should lift off the ground.

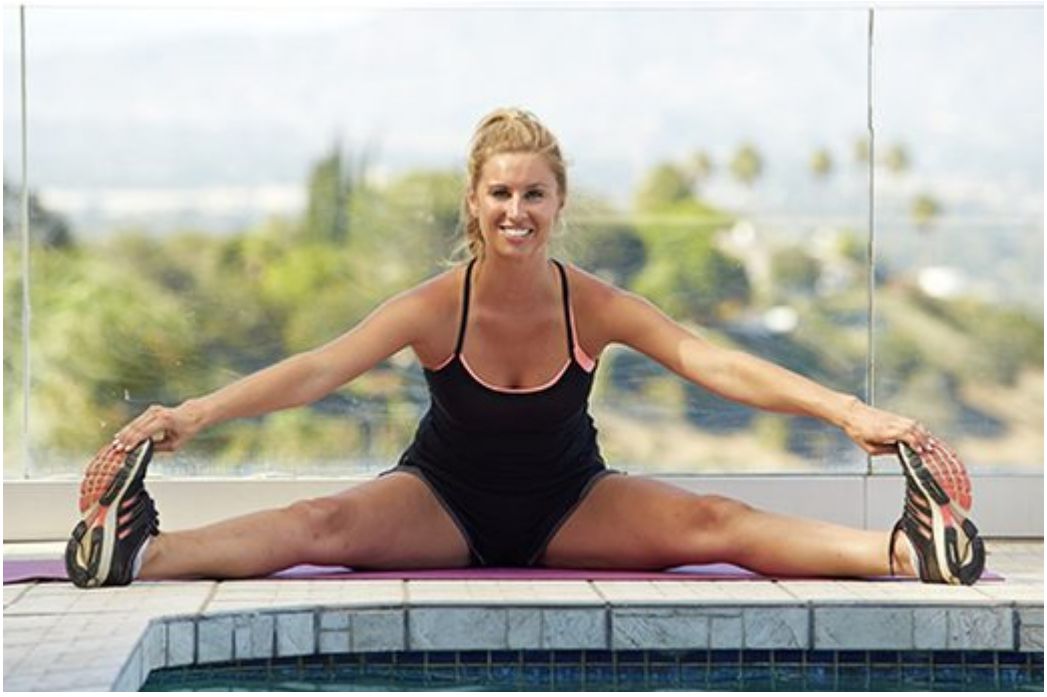

5 Yoga Poses to Firm the Butt

13. Happy Baby Pose

Happy baby is an excellent stretch for the lower back, glutes, hamstrings and hips. It’s also a great counter-stretch to upward dog, because it relaxes and opens tight lower-body muscles. HOW TO DO IT: Lie on your back with knees bent in toward the chest, the soles of your feet flexed and parallel to the ceiling. Line your ankles up with your knees so your shins are vertical. Keep your tailbone down as you grab the outsides of your feet with your hands and pull them down so the knees move toward the floor on the outsides of your rib cage. Relax your neck and breathe deeply, lengthening the breath as you go. With each exhale, and without compromising form, pull the knees toward the floor. Hold this pose for three to five minutes.

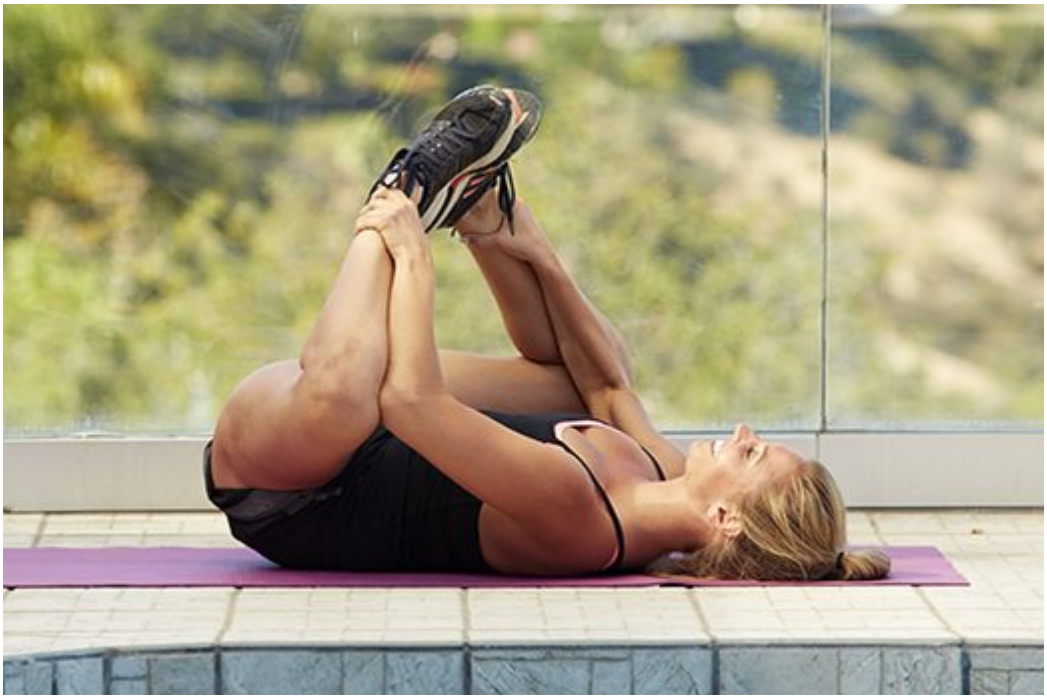

The Best Yoga Poses for Runners

14. Seated Straddle Stretch

The average person sits at a desk most of the day, which constricts and stagnates the muscles in the pelvis and groin. Straddle increases blood flow to that area, which means increased sensation and easier orgasms. It also stretches the inner thighs, making you more flexible and ready to play with some more adventurous positions. HOW TO DO IT: Sit on the floor with your legs wide apart. Flex your feet and make sure your knees are pointing toward the ceiling. Roll your shoulders back, lengthen through the crown of the head and, while lifting the chest, slowly press your torso as far forward as you can comfortably go without rounding your back. Reach your hands to your calves, ankles or toes and breathe deeply. With each exhale, take your stretch a little deeper. Hold the position for five to 10 long breaths.

Yoga Poses for Flexibility

15. Reclined Butterfly Pose

This version of the yogic butterfly pose will open up your hips and stretch your inner thighs. It targets the muscles that are constantly stretched and challenged in a multitude of sexual positions, enabling you to be strengthened, loosened up and ready for your partner. HOW TO DO IT: Lie on your back and, keeping the tailbone down, bend your legs toward your chest, soles of the feet together. Grab your feet and pull them toward your chest as you use your elbows to press the knees outward. Be careful not to let your head arch back too far. Keep the neck and spine relaxed. Hold this posture as you continue to press the knees outward for 15 to 20 seconds.

Yoga Poses to Help Bad Knees

13 Exercises Every Man Should Do to Improve His Sex Life

Overview

Want to give your sex life an added boost? It’s as simple as

hitting the gym. Exercise increases energy, tones your muscles, burns fat and improves your mood and self-image. But for more reasons than you may know, exercise can also improve your sex life. For instance, research shows that if you burn as little as 200 additional calories a day, you can lower your risk of erectile dysfunction. In addition to cardio and strength training, stretching is also loosens you up, enabling you to experiment with different positions. So even if you already have a pretty great sex life, try incorporating these 13 exercises and stretches into your workout routine and reap the benefits in the bedroom.

1. Kegels

You read that right. Kegels are a beneficial exercise for men, too. They improve endurance and control by toning and strengthening the pubococcygeus (PC) muscles (the muscles that stop the flow of urine) and the perineal muscles (the muscles that support erectile rigidity and provide the power behind ejaculation). “Pelvic floor muscle training can prove helpful in many situations: overactive bladder, erectile dysfunction [and] premature ejaculation,” says Andrew L. Siegel, M.D., co-creator of the Private Gym pelvic floor muscle-training

program for men. HOW TO DO THEM: Start by interrupting the flow of urine when going to the bathroom to get familiar with the PC muscles. Once you're familiar with them, your goal will be to progressively increase the squeeze duration, intensity and number of reps until you tire. But when you do them, don't hold your breath, push down or tighten your stomach, buttocks or thigh muscles. Work up to five-second squeezes, relaxing in between each contraction, for 10 to 20 reps.

How to Treat Erectile Dysfunction Without Medication

2. Plank Pose

Holding a plank is one most effective ways to increase your endurance and stamina at the gym and in the bedroom. Planks give your arms staying power for missionary or other on-top positions. They also strengthen your core, which helps to improve thrust and supports your back to prevent injury. HOW TO DO IT: Start at the top of a push-up with your hands shoulder-width apart, arms strong and pelvis level. Think of your body as a solid wooden plank. While there, engage the abs, squeeze the inner thighs and butt cheeks together, tighten the quads and press the heels back so the feet are

flexed. Hold for at least 20 seconds and work up to two minutes at a time. Do one to 10 reps a day, depending on the length of your plank holds. You can modify the pose by doing your plank on your knees, keeping the arms fully extended to the floor or by doing plank on your forearms. For an added challenge, place one foot heel to toe on top of the other and hold for 10 seconds, and then switch legs without compromising form in the rest of your body.

30-Day Ab Challenge

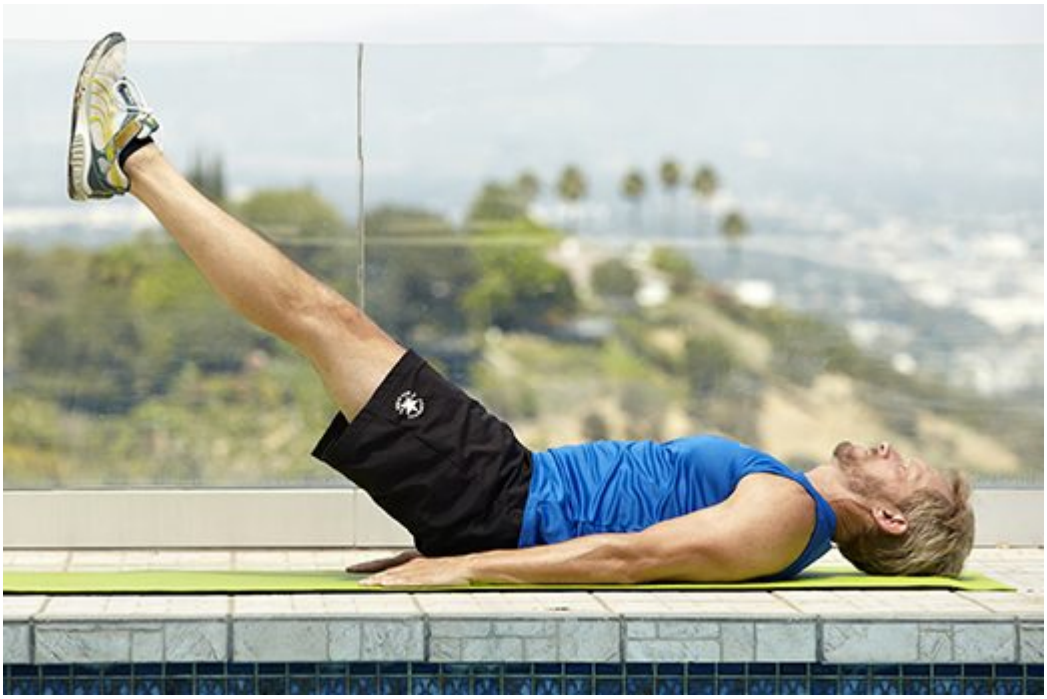

3. Stability-Ball Crunches

This variation of the standard abdominal crunch requires balance and stability and targets your core. A stronger core improves your thrusting ability and strengthens your back, which can often be injured during sex, and the ability to balance in a variety of sex positions. HOW TO DO THEM: Place your middle to lower back on a large stability ball, with your feet (about hip- or shoulder-distance apart) planted firmly on the floor. Place your fingertips behind the nape of your neck, roll the shoulders back and slowly, while lifting through the chest, raise your upper body until your abdominal muscles

tighten. Take it as high as you can manage without compromising form. Slowly return to your starting position and repeat. Work up to three sets of 30 crunches.

21 Sit-Up Variations You Won’t Totally Hate

4. Lying Leg Raises

Lying leg raises provide an intense core workout, which helps improve thrust and provide mild engagement in the quads and glutes, helping you last longer in upright positions. HOW TO DO THEM: Lie flat on your back with your legs stretched out in front of you. If you have any back issues, fold a towel and put it under the small of your back. With precision and control, raise your straight legs up toward the ceiling and stop when your legs are perpendicular to your body and the floor. Then, slowly lower your legs back down until they are about an inch off the floor. If the exercise feels too easy, try to lower more slowly. Repeat five times then rest for 30 seconds. Start with three sets and increase repetitions and sets as you get stronger. To modify this exercise, start with your legs bent at the knees and calves parallel to the floor. From there, straighten the legs to the ceiling then slowly

lower the legs back into the bent-knee position. Lower your bent legs toward the floor until the toes are an inch from the ground. Return to the start and repeat.

3 Cardinal Rules of Fast Six-Pack Abs

5. Push-Ups

Push-ups strengthen your upper body and core, providing increased all-around endurance and enabling you to rock those on-top positions during sex. If you commit to doing them regularly, you'll notice a difference in your staying power, your ability to maintain a strong thrust and your overall core and upper-body strength during sex. HOW TO DO THEM: Begin in a plank position, hands directly under the shoulders and feet hip-distance apart. Do not allow your pelvis to sag too low or lift too high. Lower your chest to the floor and slowly press back up. Do as many of these as you can manage at least twice a week. To modify, take your feet slightly wider apart or drop to your knees, keeping a solid plank position from your neck to your knees. For added intensity, bring your feet together and your hands in slightly. Try adding a clap between push-ups or do one-armed push-ups if you're feeling really strong.

30-Day Push-Up Challenge

6. Stability-Ball Bench Press

The bench press strengthens the pecs, deltoids, forearms, biceps, triceps, lats and abdominals, especially when done on a stability ball. That increased muscle mass and decrease in fat (though regular exercise and a healthy diet) not only makes you look and feel better, it will also prepare your body for whatever you and your partner choose to do between the sheets. HOW TO DO THEM: Place your middle to lower back on a large stability ball with your feet planted firmly on the floor about hip- or shoulder-distance apart. From a goal-post position, push a pair of dumbbells (start with 20 pounds and increase from there) straight up, directly over the chest. Do three sets of 25 reps. Being on the stability ball will provide the added core and balance workout – also great for enhancing your bedroom performance!

Get Superhero Arms With Ascending Trisets

7. Squats

Because squats are known to increase testosterone levels and to increase blood flow to the pelvic region (making orgasms more intense), they’re an incredible exercise for enhancing sex. They’ll also strengthen your lower body for a more powerful thrust both while you’re on top and while your partner is on top. HOW TO DO THEM: With a dumbbell in each hand held straight down at your sides, bend at the hips and knees to squat as low as you can while keeping your back straight. Keep your shins as vertical as possible and your knees directly over your ankles. As you lower, slowly raise your arms straight out in front of you to shoulder height. Drive through the heels and you will naturally lean forward a bit in the upper body for balance. Slowly rise to standing as you lower your arms back down to your sides to complete one rep. Do at least 15 reps.

12 Essential Squat Variations to Try

8. Stationary Lunges

Lunges in general are great for building strength, endurance, mobility, balance and core stability. But lunges also increase blood flow to your pelvic region, enhancing your action in the bedroom. They'll help out when you could use an extra dose of balance and hip flexor mobility or when you'd like to go a little longer. HOW TO DO THEM: Stand up straight and tall — holding a pair of dumbbells at your sides for added intensity — then step one foot forward about a foot and a half. Bend both knees to 90 degrees, stopping when your back knee is about an inch from the ground. Be sure to keep your front knee doesn't pass over your front toes. Drive through the front heel to stand back up. Do 15 reps before switching legs or alternate legs as you go.

11 Simple Ways to Add Variety to Your Strength-Training Routine

9. Interval Training

Doing interval training will increase your stamina and endurance. And you can do intervals just about anywhere – outside on a track, at the park or on a bike, elliptical, stair climber or treadmill. HOW TO DO IT: After your warm-up, start your intervals at full speed, going as hard and fast as you can, and push yourself for at least 30 seconds. Then back off for a minute or two. Repeat this several times. Add these to your workout a couple of times a week and soon you'll be ready to go longer or be ready whenever your partner wants to go again.

The Optimal Training Program to Build Strength and Performance in 4 Weeks

10. Upward-Facing Dog

Upward-facing dog is a yoga pose that stretches the core, psoas and hip flexors, increasing energy and blood flow to the pelvic area. This stretch also protects your lower back for any heavy lifting you do at the gym or bedroom. HOW TO DO IT: Lie on your belly with your legs hip-distance apart and the tops of your feet on the floor. Bring your hands to the sides of your chest and lift your torso by pressing through your hands. Lifting all the way up, roll your shoulders back and down, lengthening through the crown of your head so you don’t hunch the shoulders into the neck. Breathe regularly for 15 seconds or longer. If you are advanced, your thighs will lift off the ground.

10 Yoga Moves to Remove Stress and Relax You at Bedtime

11. Seated Straddle Stretch

If you sit at a desk or work at a computer for hours a day, it can constrict and stagnate the muscles below the waist. Doing a straddle stretch will loosen things up, bringing blood flow back to the pelvic and groin region. Increased blood flow means increased sensation, which means better orgasms. It’s also an excellent inner-thigh stretch, which will enable you to introduce some adventurous positions in the sack. HOW TO DO IT: Sit on the floor with your legs wide apart. Flex your feet and make sure your knees are pointing up toward the ceiling. Roll your shoulders back, lengthen through the crown of the head and slowly lean as far forward as you can comfortably go while keeping your back straight. Reach for your calves, ankles or toes and breathe deeply. With each exhale, take your stretch a little deeper without curving or hunching your back. Hold the position for five to 10 long breaths.

Yoga Poses for Flexibility

12. Reclined Butterfly Pose

This stretch loosens up your inner thighs and your hips, the muscles that are constantly stretched and challenged in a variety of sexual positions. By adding the butterfly stretch to your workout, you'll be strong, loosened up and ready for action! HOW TO DO IT: Lie down on your back and bend your legs in toward your chest, soles of the feet together and your tailbone down. Grab your feet and pull them in toward your chest as you use your elbows to press the knees out. Be careful not to let your head arch too far back. Keep your neck and spine relaxed. Hold this posture as you continue to press the knees outward for 15 to 20 seconds.

Yoga for Runners

13. Twisting Forward Bend

This two-part stretch will feel like a full rejuvenation to a lot of those muscles that tend to fatigue easily. It reaches the inner thighs, hamstrings, obliques, pecs, triceps and lats. If you only do part one, you'll notice a huge difference, but try both if you can. HOW TO DO IT: Sitting on the floor, extend your left leg out straight, tucking the bottom of the right foot flat against the left inner thigh (right thigh flat on the floor). Twist your torso so your chest is squared toward your bent right knee. Wrap your right arm toward the back and around the back of the waist and try to grab hold of your left thigh with your right hand. Take your left arm/hand and reach for your calf, ankle or toes, without bending your left knee. Roll the right shoulder back and open the chest by pushing the middle back forward. Breathe and hold this stretch for several seconds up to a minute. For the second part, release your right arm and move it slowly up toward the ceiling and around toward the toes. As you do that, take the crown of the head toward your toes. Bring your right palm down toward the floor and, with each breath, lengthen through the right fingertips toward your left toes. Breathe

and hold for about 30 seconds. Slowly rise, bring both legs forward to shake them out and switch sides.

Yoga Postures to Help Bad Knees
